

B.S Sexism at Peterborough Public Health

B.S is Brian Sammon a locally employed Public Health officer holding unilateral power to shut down local female business owners.

He's not a resident of Peterborough nor does he care to join our community. Cabinet Minister Monsef who stands for Gender equality uses her government title and clout to drive social media traffic to the Peterborough Health units social media. Connected through social media is Brian Sammon and he promotes sexism. He works for the Health Unit locally, and I have complained to the Minister and the medical health officer.

I fight bullies. I am a local business and property owner in downtown Peterborough. I'm concerned with social welfare and restored downtown properties such as the Hobarts building on Hunter using local unemployed workers and no general contractor. My wife is Dr. Rita Kilislian. She dedicates 1/3 of her day treating Peterboroughs most vulnerable patients at her own expense or from the kindness of her heart. She's an advocate for senior dental programs and believes seniors in Peterborough should be able to access the highest quality care from the dentist of their choosing with government funding.

I am the Executive Director of Redemption Advocates Canada. We fight bullies with the enlisted help of professor Alan Young, founder of the Innocence Project, Jeremy Bieber, Criminal Lawyer Greg Lafontaine, Lawyer J. Natale and Lord Conrad Black. We have highlighted the importance of a court of public opinion to provide access to Justice. Justice delayed is Justice denied. The Peterborough Public health unit has some great caring people behind it like Donna and Dr. Salvaterra; however, they need to stand up to Brian Sammons sexist views and Minister Monsef should too.

Lord Conrad Black, Andy Curnew

I don't see the seniors and marginalized patients of Peterborough as clients like the Peterborough Public Health unit calls them. I see them as patients, patients in need. Referring to them as clients denotes its a business to public health locally whereas to my wife, a patient in pain needs her yesterday not today. I'm concerned that Brian Sammons sexism will instill fear in local females in private dental, and the result is more funding from the government for the Peterborough Health unit; however the patients don't have a right to choose their provider. They're forced to attend at the Public Health Unit rather than the dentist they want to go to. This is wrong. Stand up for seniors and low income families right to choose the dentist they want to be treated by and revolt against sexist health inspectors and sexism everywhere.

Dr. Rita Kilislian, Andy Curnew & Alexa Curnew

Minister Monsef follows Peterborough Public health on Instagram. She does so with the Power of Prime Minister Justin Trudeau and the Canadian Government behind her. Not only is this partisan for a municipal lobbyist; moreover, it's wrong because on Brian Sammons social media he posted the following and captioned it with the emoji meaning disgust- and "women drivers."

An unfortunate mother was forced off the road into a farm field, as emergency workers arrived on scene to assist with rescuing the occupants in this terrifying scene, local health inspector Brian Sammon dangerously pulled out his cell phone to record the incident and posted it to social media and attributed the horrible accident to a "woman driver."

When I complained to Peterborough Public Health they lawyered up around Brian Sammon and I'm concerned they may retaliate against my wife because of my anger towards their failure to stop their inspectors sexism while in a position of power they gave him. I'm calling on minister Monsef and Dr. Salvaterra, and all other community members to petition our government for #genderequality. We are not equal until we're all equal.
